Over Half the Stock Exchange Business in the Trust Shares.

The Clique Does a Pile of Hammering to Entrap the Shorts-Little to Note in Indianapolis Grain.

At New York, yesterday, money on call

was easy at 1 per cent. Prime mercantile paper, 24/05 per cent. Setrling exchange was steady to firm, with actual business in bankers' bills at

\$4.88%@4.89 for demand and at \$4.87%@ 4.87% for sixty days; posted rates, \$4.88% and \$4.90; commercial bills, \$4.86\\64.86\. Silver certificates, 64@65c. Bar silver closed at 63%c per ounce; at London, 2916d. Total sales of stock amounted to 203,311 shares, with Sugar leading with 114,900. Were it not for the heavy transactions in Bugar yesterday's stock market would have been tame indeed. What little activity there was in the rest of the list was confined to St. Paul, General Electric and Chicago, Burlington & Quincy. At the opening of business Sugar was heavily pressed for sale and quickly declined 31/2 per cent. The break was credited to manipulation by the sugar pool with the view of inducing the shorts to extend their lines and the bears did help to send the priced ownward by adding to the bulk of the sales. When the low point was touched buying orders came in, which which caused a rally of 21/4 per cent., but renewed selling sent the figures back to within % of the bottom price of the morning. Later in the day a recovery of 11/2 was made, of which I per cent. was subsequently lost, with a final rally of 1/4, the closing sales being at a decline of 1/4 per cent. on the day. Sugar, preferred, lost 11/4 per cent., St. Paul, after a decline of 1/2, rose 3/4 per cent., then a drive was made on the stock, on the reported bond sale, but it was firmly held, giving way toward the close 1/4 per cent., with a rally of 1/8, and closing above Monday. It has been learned that the St. Paul company, at private sales Monday, disposed of \$2,000,000 of four-per-cent. general mortgage bonds to reim-burse the treasury for outlays for equipment, and to retire maturing bonds. There are still in the treasury \$2,735,000 of these bonds available when occasion requires. Burlington & Quincy receded % in the morning, but rallied promptly, selling up a per cent., of which % was lost at the close. Rock Island is unchanged on the day and Northwest 1/2 higher, General Electric was sold for the Boston account

made, the closing price being only 1/8 above the lowest made. The general market moved sluggishly and with irregularity, the prevailing tone being duliness, the fluctuations, as a rule being confined to narrow limits. The speculation was heaviest during the last hour and closed weak. The only changes in prices exceeding a fraction were declines of I per cent. in Michigan Central, in Duluth, South Shore and Atlanta. in Evansville & Terre Haute and 7 per cent. in St. Paul & Duluth, pre-The railway and miscellaneous bond mar-

at the opening and receded % per cent.,

then on fairly good buying advancing %

per cent. In the late afternoon another selling movement was developed in the

stock and a break of 1% per cent. was

ket was generally well held throughout the day and closed irregular. The princt-pal changes are: Advances-Grand Trunk firsts, 41/2; Mobile & Ohio new sixes, 11/4; American Cotton Oil eights, 14; Louisville & Nashville consols, 6. Declines-Pittsourg & Western fours, 2; Chicago & Erie comes, 14: Atchison seconds, 1: Lehigh Wilkesbarre consols assented, Northern acific thirds and Ohio Southern fours, ch 1 per cent. Government bonds were easier. State

bonds were inactive. The following table, prepared by James E. Berry, Room 16, Board of Trade, shows the range of quotations: Open- High- Low- Clos-

LOCAL GRAIN AND PRODUCE.

Changes in Values.

Trade Fairly Good for May, with Few

There was but little new in the local markets yesterday. On the wholesale streets and on Commission row merchants were fairly busy, and while the volume of business is not what it should be, it is so much of an improvement over that of some months past that little complaint is heard. In prices, yesterday, there were few fluctuations. On Commission row it is difficult to keep track of prices on some articles, so much are they governed by the

receipts from hour to hour. Good fruits or vegetables command the prices given in quotations as revised every day. The provision market has taken on a steady tone. Receipts of poultry and eggs are large and prices easy. The market is overstocked with butter of poor quality, but a choice article will find ready sale at better prices than we quote. The local grain market is featureless. Receipts are not large, but for corn and oats the request is good, but little is said about wheat. Track bids yesterday ruled

as follows: Wheat-No. 2 red, 53%c; No. 3 red, 51%c; rejected, 40@50c; wagon wheat, 54c.
Corn-No. 1 white, 40½c; No. 2 white,

PRICE RECORD

Chicago Wheat Again Goes Below Any Former Quotation.

May Touched 565-8 Cents, with All the News One Way-Provisions Also Lower All Around.

CHICAGO, May 8.-Weakness agair. marked the day in the wheat pit, May making a new low-price record at 56%c. and July finishing %c lower than yesterday. Lower cables, large Baltic shipments, favorable weather and liberal selling were bear features and overcame a temporary advance in the middle of the session caused by some rather free buying. July corn closed unchanged; oats, 4c higher, and provisions finished lower all around.

Wheat ruled more active, within %c range. The feeling was again weaker at lower prices, and the closing showed 1/4@ 4c loss. As on yesterday, the news was largely bearish, the lower cables, very large Baltic shipments, favorable weather and larger Northwest receipts all tending to weaken values. Offerings from the start were much larger than expected. Initial transactions were at fractional declines, and under fairly liberal offerings sold down 1/4c more, when the price rallied 1/4c, eased off %c, advanced 4c, changed some and closed as stated. Outside markets were lower, and early cables quoted 1/2d decline. A prominent local trader who covered a good deal yesterday was a moderate buyer early, but sold quite heavily later, and the advance caused by his early purchases was

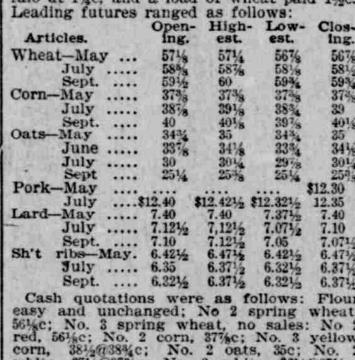

In corn the opening showed a fractional loss and sold down a trifle more, when the demand picked up and prices rallied 1/4@1/2c, became dull, changed but little and closed unchanged for July, but with May %c high-er. The course of prices was governed by the weakness of wheat. There was a better trade in June and July

oats, but very little in May. Outside buying orders for June, and especially July, were more numerous, and prices advanced %2%c, and finally closed steady at about the top figures, while May and September

remained steady.

Duliness and weakness were the features of the provisions markets. The latter was caused by a decline in live hogs at the yards. A little strength was subsequently developed on some buying and the upward movement in wheat. The market was later offered down, particularly pork, with no one to take it. The decline was emphasized by the break in wheat. A better feeling prevailed at the close, although there was no material change in values, except that ribs closed strong at the outside prices, with pork and lard steady at the decline. Compared with yesterday, July pork is 74c lower, July lard .074c lower, and July ribs .05c lower,

Estimated receipts for to-morrow are: Wheat, 62 cars; corn, 110 cars; oats, 115 cars; hogs, 24,000. A better inquiry existed for vessel room and rather steadler. Charters for wheat and corn were made to Buffalo at 11/4c, and a load of wheat paid 11/2c. Leading futures ranged as follows:

Under the present conditions necessary to success in fruit growing no farmer will venture to make a crop without the use of appliances for spraying his trees and vines with the well-known solutions for destroying insects, fungi and parasites. As this is the season for such work reference to the materials used for making solutions will not be out of place. The kerosene emulsion for destroying lice, aphides and large insects is made by dissolving one pound of hard soap in a gallon of boiling water, adding two gallons of kerosene, re-moving the vessel from the fire to avoid danger. The mixture is at once churned briskly until the kerosene and soapsuds are

intimately mixed as an emulsion. Kerosene will not mix with water, but may be made into an emulsion with milk or a strong solution of soap. When cold the emulsion is of the consistency of cream. Twenty gallons of cold water may then be added, and it is ready for use, being applied as a fine spray with a sprayer. The Bordeaux mixture is used for de-stroying fungi and also as a protection against some insects. It is a cheap substance, and may be easily prepared. Dis-solve six pounds of sulphate of copper (bluestone) in ten gallons of boiling water, or in as much water as may be necessary to dissolve the sulphate. Slake four counds of lime in another vessel, and then add enough water to make a white-wash. Pour this slowly into the copper sulphate solution, through a piece of cheese cloth, or other suitable strainer, and then add thirty gallons of cold water. Two ounces of paris green added to the mixture makes it an excellent insecticide as well as fungicide. For grape rot, potato rot and other diseases due to fungi, it is invaluable, and may be applied with advantage after every heavy rain. It destroys the spores and may also be sprayed on the ground around the base of the vine or tree. It is also excellent for potatoes as a protection against the beetle (when the paris green is added), being sprayed as a fine vapor, so as to reach every leaf. It is important that all por-

tions of the vine or tree be treated with the mixture. The kerosene emulsion is ten times cheaper than kerosene, and may be used on trees that would be injured by unadulterated kerosene, and even more water may be added without impairing the efficiency of the mixture. In using Paris green or London purple, the addition of ime lessens the liability of damage to the leaves. The emulsion will destroy the tent caterpillar if sprayed on and into their webs, and for ridding poultry houses or buildings of lice it is equal to any method known. The amount of copper used is very small in the copper solution, compared with the volume of water added, hence the quantity adhering to fruit is very insignificant, and causes no injurious effects to consumers. The solutions are here given because of their cheapness and the ease with which they may be prepared. They have been used over every portion of the country with success.

The "Unwomanly" Argument. Pall Mall Gazette.

The only serious argument against feminine smoking that I have ever seen is that it is "unwomanly"-which begs the question. "Womanly" things are things which well-bred women do at any given time and in any given place. In Turkey it is unwomanly to show the face. In Japan It is unwomanly to enter a room before your husband. In Germany it is unwomanly to shake hands with a mere acquaintance-if it be a man. In England, twenty years ago, it was unwomanly to ride in a hansom. Now it is not; simply because women habitually ride in hansoms. And so if women really wish to prove that it is not "unwomanly" to smoke the only thing they have to do is to smoke. But

it is none of my business.
